

RACHEL PFEIFLE

Senior Rising Star Designer
Erie, Pennsylvania – January 2011

In July of 2010 I was diagnosed with a very aggressive form of breast cancer, called inflammatory breast cancer. This type of cancer invades the lymphatic system. My children, ages eight and 10, are handling this situation very well. I have had eight chemotherapy treatments, a mastectomy, and am now preparing to begin 37 boosts of radiation. When my surgeon performed my mastectomy she was unable to get clean margins for me so I still have a small amount of cancer in my body. I had 16 out of 22 lymph nodes test positive for cancer.

My dream is to now share Christ's sovereignty, mercy and grace through my Celebrating Home business. I believe that He will use my testimony, through this illness and my business, to help me gain new friendships and establish great trust and respect to bring not only to my Celebrating Home team but into the Kingdom of Christ.
